

The Tea Spot™ is a leading producer of handcrafted loose leaf teas and the creator of Steepware® - housewares tools that make loose tea easy. Its vision to modernize the loose leaf tea experience has held steadfast since the for-profit philanthropic company was founded in 2004 by Maria Uspenski, a cancer survivor drawn to the health benefits of loose leaf tea during her recovery. Her message is simple and powerful: tea in its freshest form renders premium flavor, unmatched health benefits, and is eco-friendly. The company's model of social entrepreneurship incorporates its mission to foster health and wellness through loose leaf tea, with its 10% Pledge; ten percent of all profits are donated in-kind to cancer and community wellness programs. The Tea Spot™ is a woman owned and operated business out of Boulder, Colorado.

The Tea Spot's premium loose tea blends are microblended in small batches in Boulder, CO. Their inspiring hot and cold brew teas rise up to meet the challenges of modern life. Whether it's a kick to get you going in the morning or just a small escape from the stresses of the day, at The Tea Spot™ there's a handcrafted tea that's perfect for every moment. With full-leaf teas and botanicals, the company has evolved age-old traditions to allow exquisite flavor and good health to collide in every cup of their award-winning teas.

Steepware® are the tools for the emerging American loose tea drinker who wants a simple and convenient way to make a perfect cup of tea anytime, anyplace. These tools bring modern convenience to loose leaf tea, so tea lovers can enjoy premium healthy tea daily. The Tea Spot's line of modern teaware include a unique array of single and multiple serving tea steeping products – all designed to make loose leaf tea easy for healthy living – be that at home, in the office, or on-the-go. All Steepware® is lead free & BPA free.

Brewlux® is the elevated loose tea filter that infuses the goodness of whole leaf tea, so you can enjoy a premium tea experience to-go. This unique structured filter is the premium alternative to teabags and paper filters for loose leaf tea. With ample room for loose tea to breathe and expand, Brewlux® allows tea leaves to unfurl into a colorful spectrum of flavors. This on-the-go recyclable infuser sits elevated in the cup, so your tea stops steeping when the water level dips below the filter. There's no wet bag to remove, and it's durable enough to be used for multiple infusions.

New from The Tea Spot™ this year are Cold Infusions™ – organic cold brew tea packs that pair with Steep & Go cold brew tea filters to make a bottle of fresh brewed tea on-the go. The Tea Spot's Cold Infusions™ are single serve loose tea packs that cold brew within 10-15 minutes in chilled or room temperature water. Each pack contains 0.2 oz loose leaf tea and yields up to 24 oz of fresh cold brew tea. Cold Infusions™ are pure certified organic leaf teas and herbals, with no added flavorings, sweeteners, or preservatives. Cold Infusions tea packs brewed with Steep & Go are the only way to make fresh loose leaf tea in a disposable water bottle.

The Tea Spot™ – making loose leaf tea your everyday luxury.
